25	Front Stage Left	Ambient Mic Right	414	TSB

We will be bringing:

6 x Sennheiser G3 EW300 IEM transmitters, operating on the following frequencies:

622.500 MHz, 624.300 MHz, 625.500 MHz, 628.800 MHz, 633.000 MHz, 641.400 MHz

Please advise if you can foresee any problems with the availability of the above frequencies in your venue. A copy of the license can be made available on request.

All IEMs will be mixed from FOH.

Preferred FOH desks are Midas Pro series.

Preferred speakers systems from d&b, L'Acoustics, Meyer.

Please, no Peavey, Yamaha, Mackie PA speakers.

Please, no Yamaha LS9, no X32 desks

If you have no other desks/PA than these then **please get in touch at least one week before the gig** and we can talk about it.

For Jarlath, we would request a sturdy bar type stool, and a small table for him to put his pipes on.

To clarify Jarlath's Whistle and Vocal setup...

He will use one B87 (which we will provide) for whistle.

We require another B87 for his vocal, this will go into a pedal onstage, this requires 2 x XLR for output.

Please get in touch if there are any issues at all, I'm happy to speak on the phone!
